Professional Experience

Freelance Web Developer/Designer

01/09 - Present

- Craft innovative user-centric interfaces, enhancing user engagement and satisfaction
- Design and build functional prototypes and wireframes using Photoshop, Illustrator & HTML/CSS/Javascript
- Design Wordpress themes for clients' specific requirements and needs
- Set up products for photographing for use on websites, retail catalogs and print magazines
- Design websites, logos, web banners, menus, posters and signs for agencies, small & start up companies
- Some of the clients and companies I've had the privilege of collaborating with include: The Breton Group, Animal Fair Magazine, NY Dress, Royal Prestige

Lead UI/UX Designer

MPTP Corp: 05/20- 9/23

- Ensure the platform offered the best possible overall user experience for the end user
- Plan, implement, manage, monitor and update the platform as needed
- Identify areas of improvement across all web properties: site performance, code optimization and QA testing
- Hire, train and evolve a team of creatives, designers, and developers to execute the company's vision
- Continuous user experience improvements to the platform are a key priority for our development strategy
- Work with the team to define road-maps based on product & technical requirements, that are aligned with the strategy, company vision and goals
- Develop and implement accessible web components using ARIA landmarks and roles to enhance navigation and usability for screen reader users

Production Automation Manager

Benchmark Education: 01/19 - 8/20

- Lead and coach a highly efficient production automation team and grow the team as necessary
- Work hand in hand with the directors daily to help promote and provide a clear vision and strategy
- Provide goals and objectives for a team of engineers and production associates
- Work intelligently towards building stable and low maintenance automation scripts
- Work without close supervision and make the necessary day-to-day decisions required to build successful automation scripts
- Test and optimize current automation scripts
- Understand and reuse existent in-house technologies to ensure deliverables benefit the team and organization in general

Senior Front End Designer

Benchmark Education: 09/14 - 01/19

- Design and develop Digital Prototypes for existing books and products, ensuring full compliance with WCAG 2.1 Level AA standards, which involved conducting accessibility audits, remediating issues, and training the development team on accessibility best practices
- Develop InDesign scripts for automating books into HTML format using previously created prototypes as templates
- Design and develop marketing driven micro-sites
- Conceptualize original ideas that bring simplicity and user friendliness to complex design roadblocks
- Create wireframes, storyboards, user flows, process flows and site maps to effectively communicate interaction and design ideas
- Present and defend designs and deliverables to peers and executive level stakeholders
- Design and develop emails that render as intended across major email clients and web browsers
- Design and developed an HTML 5 responsive grid base framework to be used throughout sites, emails, and digital products
